

You're invited to hear Toyota discuss how to apply lean principles to inbound logistics for dramatic improvements.

Please join us for a private reception (cocktails and dinner) on Monday, September 30, 5:30-8:00 p.m.

Guest Speaker: **Mr. Wally Palen**
Production Control & Logistics
Toyota Motor Manufacturing, NA

Many manufacturers face the same challenges as Toyota and other automotive companies. These challenges may include how to:

- extend lean principles to inbound logistics planning
- understand the impact of new product/new model development on logistics,
- get all departments working together for the most profitable logistics plans,
- adapt logistics plans as conditions change,
- develop plans that enable the lowest total delivered cost, and
- examine the relationship between packaging and transportation.

Learn how Toyota is tackling these challenges, and how you can apply the same methods in your organization for amazing results.

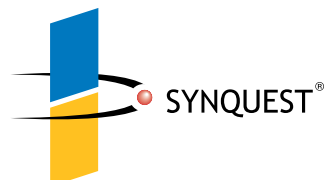

Where: Thirsty Bear Brewing Company
661 Howard Street • San Francisco
415-974-0905

RSVP by 9/25 770-325-2960/jmuir@synquest.com
